For locally recruited staff the level of danger pay is set at 30 per cent of the applicable General Services salary scales and using as a reference the net midpoint of the applicable scales in effect in the year prior to the scheduled review.

Formula for establishing danger pay amount for locally recruited staff effective 1/1/2021 :

1. Add the total net annual salary at lowest level/step, to the total net salary at the highest level/step (excluding long-service and longevity steps, if any) of the latest local General Service salary scale in effect in 2019;

2. Divide result of (1) above by 2;

3. Multiply result of (2) above by 30%, to get the annual rate;

4. Divide result of (3) above by 365, to get the daily rate.

Thereafter delink danger pay from the applicable GS salary scale. In accordance with the established schedule, the the next review of danger pay level will be conducted in 2023.
